PROFESSIONAL SUMMARY

AI Product Manager with 3+ years of product management experience and 9+ years of cross-functional leadership across B2B SaaS, retail, and media. Proven ability to translate ambiguous enterprise problems into scalable AI solutions — from RAG systems and LLM-powered chatbots to real-time personalization engines. Experienced in end-to-end product development (problem definition to MVP, pilot, and scale), partnering with machine learning engineers, data scientists, and business stakeholders. Strong foundation in Generative AI, digital transformation, and structured thinking, with a 'show, not tell' mindset and a track record of measurable impact.

KEY SKILLS & TOOLS

AI & Product Strategy: AI/ML Product Design, Generative AI, RAG Architecture, LLM Integration, Product Lifecycle Management, MVP Definition, A/B Testing

Growth & Delivery: Funnel Optimization, Conversion Rate Optimization, Cohort Analysis, Retention, OKR & KPI Planning, Data-Driven Decision Making, Agile/Scrum, PRD Writing

Data & Analytics: Amplitude, Google Analytics (GA4), Microsoft Clarity, Linear, Clevertap, Yotpo, PowerBI, Tableau

Enterprise Transformation: Digital Transformation, GTM / Go-to-Market Strategy, Cross-functional Stakeholder Management, Problem-Solving, Structured Thinking

AI Tools: Claude Code, Antigravity, Replit, Bolt, Lovable, Framer AI, Julius AI, n8n, Zapier, Notion AI, WhimsicalAI, GammaAI, muroAI, NapkinAI, CanvaAI

Product & Collab Tools: JIRA, ClickUp, Figma, Whimsical, Freshsales CRM, Zoho CRM, Sprinklr, WhatsApp Business API, Linear

PROFESSIONAL EXPERIENCE

AI Product Manager | Sentisum | Bangalore (Remote) | Feb 2026 – Present

B2B Voice of Customer intelligence platform — clients include Razorpay, L'Oréal, Flipkart.

► Ask Kyo — AI-Powered CX Intelligence Chatbot

- Defined product vision and roadmap for Kyo, an NLP-based AI chatbot enabling enterprise users to query customer sentiment, tag trends, and anomalies in plain English; designed multi-modal architecture (Deep Dive, RCA, Metrics modes) with LLM-structured insight cards and suggested next steps.
- Led cross-functional execution with ML engineers and data scientists to embed Kyo within the Anomalies investigation workflow. **Impact: 40% increase in product adoption; churn risk reduced**

► Anomalies Redesign — ML + Rule-Based Alert Intelligence

- Owned end-to-end PRD redesigning the Anomalies module into a triage-first experience with AI-ranked priority levels, hybrid OR-logic detection (ML + threshold rules), and weekday/weekend baseline adjustments to cut false positives.
- Impact: DAU/MAU improved by 25%; first-meaningful-action target <30 seconds.**

► Zero-Shot AI Onboarding — Time-to-Value Acceleration

- Delivered AI-powered onboarding automation that auto-generated alert rules, dashboard templates, and metric configs at client signup via zero-shot LLM prompting — replacing a 30-day manual process.
- Impact: Onboarding reduced from 30 days → 3 days; product adoption +20% within first 30 days.**

► GTM-Led AI Positioning

- Developed AI product positioning and demo collateral for enterprise prospects. **Impact: 4 new enterprise client wins, ACV \$10,000/month.**

Product Manager | Lenskart | Bangalore | Jun 2025 – Jan 2026

India's largest omnichannel eyewear retailer with 2,000+ stores and a rapidly scaling digital product suite spanning app, mSite, and in-store tech.

- AI Influencer Intelligence Tool:** Designed and launched an AI-powered creator recommendation system that extracted brand intent, matched influencers semantically, and pulled real-time trend signals from Google Keywords, Reddit, and X to guide campaign ideation — replacing manual briefing workflows. **Impact: CPQE improved 30%; campaign TAT reduced 80%.**
- Project Handheld — In-Store AI Personalization:** Built an RFID-enabled mobile platform allowing customers to browse, try, and purchase autonomously in-store, integrated with facial recognition and personalization APIs to deliver tailored product and offer recommendations in real time. Piloted across 10 stores. **Impact: Store conversion +4.5%, AOV +6%.**
- AI Video Generation & Real-Time Content:** Introduced AI-rendered and UGC videos (360°, multi-gender, multi-use-case) into app and mSite product pages; ran A/B tests comparing long vs. short-form formats to optimize engagement and purchase intent. **Impact: Conversion rate improved from 6.08% to 10.5%.**

- **Multi-Touch Attribution Model:** Built a multi-channel attribution framework linking data from app, website, CRM, email, and in-store interactions — enabling marketing teams to accurately allocate budgets across channels based on actual contribution to revenue. **Impact: ROAS improved from 3.7 to 4.5.**
- **Reviews & Ratings Personalization:** Rolled out a personalised product rating logic that weighted reviews based on reviewer attributes such as face shape, skin tone, and frame type — making ratings more contextually relevant to each shopper. **Impact: Conversion +7%, NPS improved on fit and quality.**

Product Manager | The Media Ant | Bangalore | Mar 2023 – Jun 2025

India's leading media planning and buying platform, connecting brands with 2,500+ media properties across digital, OOH, radio, and print.

- **Project Maggie — AI Media Planning Tool (RAG):** Conceptualised and deployed a Retrieval-Augmented Generation system that fetched historical campaign data, brand SKUs, and competitor intelligence to auto-generate optimised media plans — eliminating manual research by sales teams. **Impact: Response time reduced from 24 hours to 2 minutes; win rate increased by 27%.**
- **Project Ad-Vantage — White-Label SaaS Platform:** Productized The Media Ant's planning ecosystem into a white-label SaaS offering for partner agencies, with a freemium entry tier, subscription analytics dashboards, and full media catalog access. **Impact: 100+ licenses sold at \$2000/year, generating \$2M + ARR.**
- **CRM Automation & AI Lead Intelligence:** Automated lead scoring and routing using Freshsales CRM integrated with n8n workflows; deployed an AI chatbot to handle FAQ filtering and pre-qualify inbound leads before sales handoff. **Impact: Manual effort reduced by 90%; qualified leads +6%; conversions +15%.**
- **Website & Pre-Sales Automation:** Drove 15% increase in website traffic and 3% lift in leads via GPT-powered content tools and industry-specific landing pages; automated WhatsApp-based plan sharing and lead scoring, improving pre-sales conversions by 30%.

Manager — Founder's Office | The Media Ant | Bangalore | Mar 2022 – Feb 2023

- Built and scaled two new business verticals — Social Media and 360° Media Planning — growing the team from 1 to 8 members while managing key accounts including L&T Finance, Flipkart, Beepkart, and Spinny.
- Developed lead-scoring automation that increased sales-qualified leads from 14% to 30% of total inbound, while cutting average turnaround time by **70% through workflow redesign.**

Founder | RMP Ispat Udyog | Jharkhand | Apr 2017 – Feb 2022

- Bootstrapped and scaled a B2B steel trading business from the ground up to **₹6 Cr annual revenue at 6–8% margin**; led a 20-member team across marketing, sales, finance, and supply chain operations.

EDUCATION

MBA — NMIMS Mumbai | Apr 2015 – Mar 2017 | Dean's List | CGPA 3.14/4.0

B.Com (Hons) — Calcutta University | Apr 2011 – Mar 2014
